

NEW!

Zigbee smart thermostats

Control your Zigbee smart thermostats and any other Neviweb® device anywhere and anytime with the Neviweb® app

Reduces electricity bills as thermostats can be adjusted and controlled simultaneously by room or by zone

Ideal for homes, condos and holiday homes

Neviweb® app

- Programmable: 7 days a week, up to 6 periods per day
- Create scenes: Define grouped setpoints to create ambiances or to set the home to vacation mode
- Energy consumption graphs: View daily and monthly consumption, per room, per zone and overall totals

Zigbee smart thermostats

OTH4000-ZB

OTH3600-GA-ZB

- OTH4000-ZB: Zigbee smart thermostat
- OTH3600-GA-ZB: Zigbee smart thermostat for floor heating systems
- Outside temperature display
- Lockable buttons
- Temperature display in Celsius or Fahrenheit
- Backlit black screen
- 3-year warranty
- Remote access requires an Internet connection and a GT130 smart gateway

Zigbee smart gateway

GT130

- Local saves ensure improved stability and industry-leading reliability.
- Programs created remotely are automatically saved in the GT130 smart gateway rather than in the cloud or on servers, which ensures devices operate properly even when Internet access is lost.

NOTE : Thermostats OTH3600-GA-GT, OTH2750-GT, OTH4000-GT and the GT125 web interface are not compatible with these products. However, they can be controlled with the same app.
